

Ewen et Arthur

We are students from the European class, so we have the luck to do activities to discover English world. For our first year, we went to Normandie and English island of Jersey. The travel has taken place from 9th to 12th May of 2022. In this little narrative text, we chose to present the day where we went to Jersey because of that was the most interested day and the island was beautiful. First, we are going to present the activities we made on this day. Then we are going to say what we thought about it . To conclude, we are going to show what the travel brought to us.

The morning we woke up early to take the boat to go to Jersey. Arrived in Jersey, a guide was waiting for us. He had to drive around the island to discover the english's landscapes. They were a little different of French's. For lunch, we went to a traditional english restaurant. On the menu,spicy chicken, fish and chips and pudding where in the plate. In the afternoon, we are allowed to be free in the city. We walked around it for hours and do shopping. It was raining and we had problems to go back in boat to France. We had to run very fast in the streets. Finally, we slept in the trip and arrived in Normandie on life.

We didn't really appreciate the road trip with the guide, it was a little bit bored. But it was also funny because we were together and there was a good vibe. The restaurant was so delicious, it was our first time we tasted a real fish and chips, and it was great. The personnel were so nice and they proposed us a coffee. In the afternoon, we made what we want. We could meet lot of people and

talk with sellers. The only bad point was the weather because we didn't think it will raining so our clothes were so wet and it was not agreeable.

To conclude, the travel brought us a different vision on England, by discovering small English cities. The travel allows us to get closer with all of us. I hope future European travels will be as great as it !
