

THE SWIRLING TOWER

A NEW AND AMBITIOUS PROJECT BY THE GAUVRIT CORPORATION

A SURPRISING ARCHITECTURAL

The Swirling Tower is a study and research center of 60 floors. There are ten sections, each limited based on the research and studies done there. There is a library, an observatory, a medical research center...

IDENTITY CARD

- Name: The Swirling Tower
- Height: 350 meters
- Number of floors: 60
- Lifts: 22
- Cost: £380.000.000

LOCATION

NOVELTIES

The light hole is the main innovative element of the Swirling Tower. The materials used and the large number of green spaces also make it something special.

A SUSTAINABLE PROJECT

- A light hole to let light in and save electricity during the day and night
- Balconies and arranged green spaces
- Solar panels on the roof
- Lighting on the city at night, saving electricity
