

# WHAT A WONDERFUL TRAVEL !

From May 9 to 12, 2022, with our European second class of Lycée Jacques Prévert, we went to Normandy, we were accommodated at the CNRG in Granville, we visited the city and Jersey's island, but in this article we decided to talk about the famous Mont Saint Michel because it was our travel's best day and we will remember it for years !

First of all, we traveled by bus towards the Bec d'Andaine's beach. During the bus ride M.Sublime taught us a lot about the Mont St. Michel and its history (even if we were still a little sleepy !) We joined guides to start the long and gruelling crossing to Mont St. Michel, during this crossing that lasted more than 2 hours, we regularly made informative breaks, always with our feet in the wet sand ! (it was very funny but it was also very filthy !). Besides, at the end of the walk we created our own quicksand, it was amazing ! (not to be reproduced without a professional!).

Then once at the Mont St. Michel we took a break for lunch and we were lucky to have free time until we continued the visit with our guides. The hardest part began because yes, at the Mont St. Michel it goes up, there are so many steps. We were able to visit many places, such as the two towers, the chapel of Saint Aubert or the cemetery but unfortunately, for lack of time, we were unable to visit the abbey. We enjoyed visiting the Mont St. Michel which is a real small town, with many alleys and its typical shops, restaurants and bars, its actually a place out of time!

At the end of the day, we can say that Mont St. Michel is a wonderful breathtaking touristic site, Normans' pride due to its magnificent architecture and all its legends.

Mont St. Michel was able to cross time through centuries !

During this travel it's was really great to discover Granville, Jersey, Mont Saint Michel and learn to ride on a catamaran but on top of that we were happier than ever by discovering each other !
